

Stand, Circular Base

Product No. OP-006 003

OP-006 003 is a flexible boom stand specially developed for using with Flexia family of video microscopes. Flexia can be tilted 90° up/down and also 360° laterally on this stand. Vertical height of Flexia can be adjusted and set manually in this stand. One extra 180° rotational adapter and one horizontal extension rod is included in delivery kit for more flexibility.

OP-006 003 might be ordered with extra long vertical rod (φ14 x 320 mm) or extra long horizontal rod (φ12 x 320 mm) for inspection of big objects. Additional Circular Bases might also be used for more stability.

OP-006 003 is made of high quality stainless steel and anodised aluminium parts.
